

USB to RS485 Compact Pro Converter
 Part no. SN-060519

This professional grade compact USB to serial RS485 adapter has its processor board built directly into its USB connector. This design makes a compact and convenient adapter cable ideal for tight spaces or applications where you need free wires/terminals at the interface end.

Serial outputs are automatically configured as additional COM ports. This converter is built around a quality FTDI processor chip which makes it the ideal choice for applications where reliability and performance is critical.

Protection against static electricity and surges up to 15KV which gives you reliable data transfers and protects the converter and your equipment from damage due to static electricity.

USB Plug and Play allows easy installation and requires no IRQ, DMA, or I/O port resources which mean that more devices can be attached to your system without the hassles of device and resource conflicts.
